Name: ____________

Date: ____________

Probability

Student learning objectives for this unit

SUPPORTING SKILLS LEGEND

I — Introduce | D — Deepen | A — Apply | R — Reinforce

☐ **1. I can organize categorical data in a contingency table or Venn diagram.**

RELATED SKILLS

- I — Construct and interpret a contingency table.
- I — Represent categorical events and their overlap with a Venn diagram.

☐ **2. I can calculate and interpret empirical, marginal, joint, and conditional probabilities from a contingency table.**

RELATED SKILLS

- I — Calculate and interpret a conditional probability.
- I — Calculate and interpret marginal and joint probabilities.
- I — Calculate probability from observed relative frequency.

☐ **3. I can identify an experiment, outcomes, events, and a sample space.**

RELATED SKILLS

- I — Identify outcomes, events, and the sample space of an experiment.

☐ **4. I can calculate theoretical probabilities when outcomes are equally likely.**

RELATED SKILLS

- I — Calculate theoretical probability for equally likely outcomes.
- A — Identify outcomes, events, and the sample space of an experiment.

☐ **5. I can use complements to calculate probabilities.**

RELATED SKILLS

- I — Use the complement rule to calculate probability.

☐ **6. I can calculate probabilities of compound 'and' events and distinguish independent from dependent events.**

RELATED SKILLS

- I — Calculate the probability of a compound and event.
- I — Determine whether events are independent or dependent.
- D — Calculate and interpret a conditional probability.

☐ **7. I can calculate probabilities of compound 'or' events and distinguish overlapping from disjoint events.**

RELATED SKILLS

- I — Calculate the probability of a compound or event.
- I — Determine whether events are overlapping or disjoint.

☐ **8. I can compare experimental and theoretical probability and explain the law of large numbers.**

RELATED SKILLS

- I — Explain how experimental probability stabilizes with many trials.
- D — Calculate probability from observed relative frequency.
- D — Calculate theoretical probability for equally likely outcomes.
