Student learning objectives for this unit

SUPPORTING SKILLS LEGEND

I — Introduce | D — Deepen | A — Apply | R — Reinforce

☐ **1. I can determine the domain and range of a function from a formula, graph, or table.**

RELATED SKILLS

- D — Determine domain restrictions from denominators, even roots, and logarithms.
- R — Read domain and range from a graph.
- R — Read domain and range from a table.

☐ **2. I can describe and apply transformations of a parent function.**

RELATED SKILLS

- R — Distinguish stretches from compressions and horizontal effects from vertical effects.
- R — Interpret transformations applied to function inputs.
- R — Interpret transformations applied to function outputs.

☐ **3. I can analyze exponential functions using their equations, graphs, and contexts.**

RELATED SKILLS

- A — Connect parameters in a formula to features of its graph.
- R — Identify horizontal asymptotic behavior of an exponential graph.
- R — Identify initial amount, rate, and time interval in context.

☐ **4. I can analyze logarithmic functions using their equations, graphs, and contexts.**

RELATED SKILLS

- A — Connect parameters in a formula to features of its graph.
- R — Identify vertical asymptotic behavior of a logarithmic graph.
- R — Interpret a logarithm as an exponent.

☐ **5. I can solve exponential and logarithmic equations using equivalent forms and logarithm properties.**

RELATED SKILLS

- A — Apply the logarithm power property in either direction.
- A — Apply the logarithm product property in either direction.
- A — Apply the logarithm quotient property in either direction.
- A — Reject solutions that make a logarithm argument nonpositive.
- R — Combine or isolate logarithms before converting to exponential form.
- R — Isolate an exponential expression and apply a logarithm.
- R — Rewrite exponential expressions using a common base when possible.
