

Systems of Linear Equations

Student learning objectives for this unit

SUPPORTING SKILLS LEGEND

I — Introduce

D — Deepen

A — Apply

R — Reinforce

- ☐ 1. I can **interpret** the solution of a linear system as an intersection point.

RELATED SKILLS

I Locate and interpret the intersection of two lines.

- ☐ 2. I can **solve** a two-variable linear system by graphing.

RELATED SKILLS

I Check an ordered pair in both equations of a system.

D Locate and interpret the intersection of two lines.

A Plot an intercept accurately on a coordinate plane.

A Use slope to generate additional points on a line.

- ☐ 3. I can **solve** a two-variable linear system by substitution.

RELATED SKILLS

I Substitute an equivalent expression for a variable.

A Check an ordered pair in both equations of a system.

A Use inverse operations to maintain an equivalent equation.

- ☐ 4. I can **solve** a two-variable linear system by elimination.

RELATED SKILLS

I Add equations to eliminate a variable.

A Check an ordered pair in both equations of a system.

A Use inverse operations to maintain an equivalent equation.

- ☐ 5. I can **create and solve** a two-variable linear system for an application.

RELATED SKILLS

I Define two variables and write two equations for a context.

A Add equations to eliminate a variable.

A Check an ordered pair in both equations of a system.

A Substitute an equivalent expression for a variable.
