Student learning objectives for this unit

SUPPORTING SKILLS LEGEND

I — Introduce

D — Deepen

A — Apply

R — Reinforce

☐ 1. I can **determine and interpret** the slope of a line.

RELATED SKILLS

- R Attach and interpret units for rates, inputs, and outputs.
- R Calculate slope from two points.
- R Determine slope from a graph.

☐ 2. I can **graph** a line from an equation and write an equation from given information.

RELATED SKILLS

- A Calculate slope from two points.
- R Convert among common forms of a linear equation.
- R Plot an intercept accurately on a coordinate plane.
- R Use slope to generate additional points on a line.

☐ 3. I can **apply** a linear function to a context.

RELATED SKILLS

- I Explain a model parameter in the language of its context.
- A Attach and interpret units for rates, inputs, and outputs.
- R Restrict a model to meaningful contextual inputs.

☐ 4. I can **identify** the solution of a linear system as an intersection point.

RELATED SKILLS

- R Locate and interpret the intersection of two lines.

☐ 5. I can **solve** a simple two-variable linear system using an appropriate method.

RELATED SKILLS

- R Add equations to eliminate a variable.
- R Check an ordered pair in both equations of a system.
- R Locate and interpret the intersection of two lines.
- R Substitute an equivalent expression for a variable.

☐ **6. I can **simplify** an expression using basic positive-integer exponent rules.**

RELATED SKILLS

- R Apply the power rule for exponents.
 - R Apply the product rule for exponents.
 - R Apply the quotient rule for exponents.
-
