

Trigonometric Identities

SUPPORTING SKILLS LEGEND

Student learning objectives for this unit

I — Introduce

D — Deepen

A — Apply

R — Reinforce

- ☐ 1. I can **rewrite** trigonometric expressions using reciprocal and quotient identities, including $\tan(\theta) = \sin(\theta)/\cos(\theta)$.

RELATED SKILLS

- I Apply reciprocal and quotient identities.
- I Substitute an identity to rewrite an expression.

- ☐ 2. I can **rewrite** trigonometric expressions using the Pythagorean identities.

RELATED SKILLS

- I Apply the Pythagorean trigonometric identities.
- D Substitute an identity to rewrite an expression.

- ☐ 3. I can **use** even/odd and cofunction identities to rewrite trigonometric expressions.

RELATED SKILLS

- I Apply even and odd trigonometric identities.
- I Apply sine/cosine cofunction identities.
- D Substitute an identity to rewrite an expression.
- D Test a formula or graph for even or odd symmetry.

- ☐ 4. I can **verify** a trigonometric identity using the required identity families.

RELATED SKILLS

- I Choose a productive identity or algebraic manipulation.
- I Maintain equivalence while transforming one side of an identity.
- D Substitute an identity to rewrite an expression.
- A Simplify an algebraic expression using operation properties.
