

Non-Right Triangles

Student learning objectives for this unit

SUPPORTING SKILLS LEGEND

I — Introduce

D — Deepen

A — Apply

R — Reinforce

☐ 1. I can **solve** a non-right triangle using the Law of Sines.

RELATED SKILLS

- ☐ I Apply the Law of Sines to determine missing sides or angles.
- ☐ D Classify triangle data as SSS, SAS, ASA, AAS, or SSA.
- ☐ A Evaluate an inverse trigonometric expression exactly or approximately.

☐ 2. I can **determine** the number of possible triangles in the ambiguous SSA case.

RELATED SKILLS

- ☐ I Test and interpret the possible outcomes of SSA data.
- ☐ D Apply the Law of Sines to determine missing sides or angles.
- ☐ A Classify triangle data as SSS, SAS, ASA, AAS, or SSA.

☐ 3. I can **solve** a non-right triangle using the Law of Cosines.

RELATED SKILLS

- ☐ I Apply the Law of Cosines to determine missing sides or angles.
- ☐ D Classify triangle data as SSS, SAS, ASA, AAS, or SSA.
- ☐ A Evaluate an inverse trigonometric expression exactly or approximately.

☐ 4. I can **select and apply** an appropriate method to solve a triangle in context.

RELATED SKILLS

- ☐ I Select right-triangle ratios, Law of Sines, or Law of Cosines from the given data.
- ☐ D Classify triangle data as SSS, SAS, ASA, AAS, or SSA.
- ☐ A Apply the Law of Cosines to determine missing sides or angles.
- ☐ A Apply the Law of Sines to determine missing sides or angles.
- ☐ A Attach and interpret units for rates, inputs, and outputs.
- ☐ A Match opposite, adjacent, and hypotenuse sides to a trigonometric ratio.
