

Lines & Introductory Functions

SUPPORTING SKILLS LEGEND

Student learning objectives for this unit

I — Introduce

D — Deepen

A — Apply

R — Reinforce

☐ 1. I can **determine and interpret** the slope of a line.

RELATED SKILLS

- I Attach and interpret units for rates, inputs, and outputs.
- I Calculate slope from two points.
- I Determine slope from a graph.

☐ 2. I can **graph** a line from an equation in a common form.

RELATED SKILLS

- I Convert among common forms of a linear equation.
- I Plot an intercept accurately on a coordinate plane.
- I Use slope to generate additional points on a line.

☐ 3. I can **write** an equation of a line from given information.

RELATED SKILLS

- D Convert among common forms of a linear equation.
- A Calculate slope from two points.
- A Isolate a specified variable in an equation or formula.

☐ 4. I can **determine** whether two lines are parallel, perpendicular, or neither.

RELATED SKILLS

- I Determine the negative reciprocal of a nonzero slope.
- I Recognize that distinct parallel lines have equal slopes.

☐ 5. I can **evaluate** a function using function notation.

RELATED SKILLS

- I Identify input and output values in a formula, graph, table, or context.
- I Identify the input and output represented by function notation.
- I Recall and correctly use the terms relation, function, input, output, domain, and range.
- A Simplify an algebraic expression using operation properties.

☐ **6. I can **determine** whether a relation is a function using the vertical line test or input-output data.**

RELATED SKILLS

I Apply the vertical line test to a graph.

D Identify input and output values in a formula, graph, table, or context.

A Recall and correctly use the terms relation, function, input, output, domain, and range.

☐ **7. I can **determine** domain and range from a graph or table.**

RELATED SKILLS

I Read domain and range from a graph.

I Read domain and range from a table.

☐ **8. I can **interpret** domain and range in context.**

RELATED SKILLS

I Interpret the range of a function in a context.

I Restrict a model to meaningful contextual inputs.

I Restrict domain to values meaningful in a context.
