

Polynomial Operations & Basic Factoring

SUPPORTING SKILLS LEGEND

Student learning objectives for this unit

I — Introduce

D — Deepen

A — Apply

R — Reinforce

☐ 1. I can **simplify** expressions using integer exponent rules.

RELATED SKILLS

- I Apply the power rule for exponents.
- I Apply the product rule for exponents.
- I Apply the quotient rule for exponents.

☐ 2. I can **add and subtract** polynomials.

RELATED SKILLS

- I Identify like polynomial terms by variable part and exponent.
- I Identify terms, factors, coefficients, variables, and degree in a polynomial expression.
- A Identify and combine like terms.

☐ 3. I can **multiply** polynomials, including binomials.

RELATED SKILLS

- I Multiply a monomial by a polynomial.
- I Multiply two binomials using distribution.
- A Apply the distributive property in either direction.
- A Identify terms, factors, coefficients, variables, and degree in a polynomial expression.

☐ 4. I can **divide** a polynomial by a monomial.

RELATED SKILLS

- I Divide each term of a polynomial by a monomial.
- A Apply the quotient rule for exponents.
- A Identify terms, factors, coefficients, variables, and degree in a polynomial expression.

☐ 5. I can **factor** a greatest common factor from a polynomial.

RELATED SKILLS

- I Determine the numerical and variable greatest common factor of polynomial terms.
- I Factor the greatest common monomial factor from a polynomial.
- A Apply the distributive property in either direction.
- A Identify terms, factors, coefficients, variables, and degree in a polynomial expression.
