

Functions & Function Interpretation

SUPPORTING SKILLS LEGEND

Student learning objectives for this unit

I — Introduce

D — Deepen

A — Apply

R — Reinforce

☐ 1. I can **evaluate** a function from a formula, graph, or table.

RELATED SKILLS

☐ D Identify input and output values in a formula, graph, table, or context.☐ A Identify the input and output represented by function notation.☐ A Simplify an algebraic expression using operation properties.

☐ 2. I can **determine** whether a relation is a function.

RELATED SKILLS

☐ D Apply the vertical line test to a graph.☐ D Identify input and output values in a formula, graph, table, or context.

☐ 3. I can **determine** domain and range from a graph or table.

RELATED SKILLS

☐ D Read domain and range from a graph.☐ D Read domain and range from a table.

☐ 4. I can **solve** for an input that produces a specified output.

RELATED SKILLS

☐ I Solve for an input associated with a specified output.☐ A Use inverse operations to maintain an equivalent equation.

☐ 5. I can **interpret** inputs, outputs, domain, and range in context.

RELATED SKILLS

☐ D Identify input and output values in a formula, graph, table, or context.☐ D Interpret the range of a function in a context.☐ D Restrict a model to meaningful contextual inputs.☐ D Restrict domain to values meaningful in a context.

☐ 6. I can **calculate and interpret** average rate of change.

RELATED SKILLS

☐ I Calculate average rate of change over an interval.☐ I Interpret average rate of change with contextual units.☐ D Attach and interpret units for rates, inputs, and outputs.

☐ **7. I can **compare** functions represented by formulas, graphs, or tables.**

RELATED SKILLS

- I Compare functions shown in different representations.
 - I Connect parameters in a formula to features of its graph.
 - I Use tabular patterns to predict graph shape and behavior.
-
