Student learning objectives for this unit

SUPPORTING SKILLS LEGEND

I — Introduce

D — Deepen

A — Apply

R — Reinforce

☐ 1. I can **solve** a linear equation arising from a geometric relationship.

RELATED SKILLS

A

Check a proposed solution in the original equation.

A

Translate quantities and relationships into an equation.

R

Use inverse operations to maintain an equivalent equation.

☐ 2. I can **solve** a proportion and interpret the resulting scale factor.

RELATED SKILLS

I

Calculate and interpret a similarity or dilation scale factor.

R

Use cross multiplication when two ratios form a proportion.

☐ 3. I can **simplify** an exact square root and approximate it when needed.

RELATED SKILLS

I

Distinguish exact values from measured or rounded approximations.

R

Extract perfect-power factors from a radical.

☐ 4. I can **calculate** distance, midpoint, and slope on the coordinate plane.

RELATED SKILLS

I

Calculate non-axis-aligned distance using the Pythagorean theorem or distance formula.

R

Calculate horizontal or vertical distance from the difference of coordinates.

R

Calculate slope from two points.

R

Calculate the midpoint of a segment from endpoint coordinates.

☐ 5. I can **substitute** measurements into a formula with consistent units.

RELATED SKILLS

I

Select and report appropriate linear, square, or angular units.

A

Apply the order of operations to a numerical expression.
