

Linearization of Nonlinear Data

Student learning objectives for this unit

SUPPORTING SKILLS LEGEND

- I — Introduce
- D — Deepen
- A — Apply
- R — Reinforce

☐ 1. I can **linearize** power or exponential data and translate between the linearized and original models.

RELATED SKILLS

- I Transform exponential data so that a linear model can be fit to its logarithms.
- I Transform power data so that a linear model can be fit on logarithmic axes.
- I Translate a linearized regression equation back to its original nonlinear form.
